Slappy Cat AI

WELCOME TO SLAPPY CAT

Our goal is to create a meme coin project that uses AI technology to facilitate people's lives and help animals. Buy tax: 0%, Sell tax: 6% (1% reflection,%1 Burn ,4% marketing and donations) Slappy Cat is a community-owned token, prioritizing the empowerment and involvement of our community. Our contract will be Renounced after launch. There will be no blacklist implementation or team tokens. The token liquidity will be locked for 1 year. SAFU contract.

Our team consists of experienced professionals who specialize in security and conduct research in AI technology. We have a passionate community dedicated to Slappy Cat, working together for the success of our project.

Slappy Cat is a community-driven project that encourages community participation. Community members can contribute to the project's direction and be involved in decision-making processes.

Partnerships and Collaborations:

We aim to establish strategic partnerships and collaborations in the future to further grow our project and provide more benefits to the community.

At Slappy Cat, we strive to continuously offer new features and improvements to our users. We organize donation campaigns to help animals and contribute to creating a better society.

Security Measures:

Slappy Cat has implemented top-level security measures. It has been scanned and verified by leading security companies.
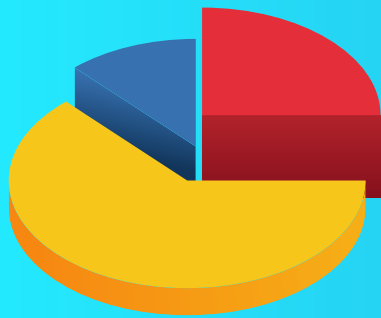

About 🐾

Our memecoin is inspired by a captivating AI-based theme, bringing a fresh and innovative approach to the crypto world. Our goal is to create a unique and exceptional experience for our users. As our project evolves, we will introduce exciting features that set us apart from other memecoins in the market.

Within our team, we have Myoshi, a seasoned developer with approximately 12 years of experience in the crypto space, specializing in security-related matters. Our CEO brings a wealth of expertise from managing numerous successful projects, ensuring a deep understanding of all aspects of our venture.

Additionally, Cat-Mom, our Marketing Manager, is a devoted animal lover who is committed to driving the success of our memecoin project and contributing to society's welfare.

We are dedicated to making a positive impact on society and improving the lives of people and animals alike. Join us on this remarkable journey, and together, let's make a difference!

TOKENOMICS 🐾

Total Supply:420,690,000,000,000

Fair Launch %75
Burn %15
Cex Listing %10

Buy tax : %0
Sell tax : %6

%1 Buy-back and Burn %1 Reflection %4 Marketing

75% of the tokens will be offered for sale on PinkSale for fair launch and liquidity purposes, supporting the launch of Slappy Cat . This allocation enables community members and investors to access the tokens.

10% of the tokens will be allocated for Cex (cryptocurrency exchange) listings, but they will be locked for 30 days. This period ensures a controlled release onto exchanges, facilitating the growth and exposure of Slappy Cat to a wider audience.

Liquidity is crucial for the successful operation and stability of Slappy Cat. Therefore, 100% of the liquidity will be locked. This measure aims to establish a secure ecosystem and minimize the risk of market manipulation.

Another notable feature of Slappy Cat is the 1% reflection given to holders on every sell transaction. This means that after each sell transaction, 1% of the transaction amount will be automatically distributed back to Slappy Cat holders. This mechanism provides a passive income stream for holders and incentivizes long-term commitment to the project.

Additionally, we have implemented a Buyback and Burn mechanism, where 1% of every sell transaction will be used to buy back Slappy Cat from the market. The purchased tokens will then be burned, permanently reducing the total supply. This feature is designed to further increase the scarcity of Slappy Cat tokens and potentially contribute to its long-term value appreciation.

In addition, 15% of the total supply will be burned, reducing the circulating supply and potentially increasing the value of Slappy Cat over time.

The tokenomics of Slappy Cat are carefully designed to prioritize liquidity, growth, and holder incentives. These features lay a solid foundation for the success of the project and encourage active participation within the Slappy Cat community.

ROADMAP 🐾

PHASE-1

- Website and Social Medias
- Safu Contract Creation
- Audit
- Pinksale Fair Launch
- Slappy Cat AI Test Version
- Cmc and Coingecko Listing
- 1,000 Slappy Cat Holders
- Aggressive Marketing

PHASE-2

- 5,000 Slappy Cat Holders
- Global Marketing
- First CEX Listing
- AI Stable Version Launch
- NFT Series Global Launch
- P2e Game Test Version
- Donations campaigns
- Shelter Land Research

PHASE-3

- 100,000 Slappy Cat Holders
- P2e PlayStore & AppleStore
- Shelter Construction
- P2e PC V1 Steam Launch
- Listing on All Top Exchanges
- Special Grand Giveaway
- Creating Slappy Cat Card
- Collaboration with Visa & MasterCard
